- Proficient in Microsoft Office: word, excel, Power point.
 - Development tools known: Ubuntu, Visual studio, Eclipse, Spyder, MySQL.
-

INTERNSHIP:

- Worked as intern at intenshala.

Domain: "Web development".

ACADEMIC PROJECT:

- Title: Diet planning

Description:

This project focuses on providing personalized exercise recommendations based on users' BMI reports while integrating a comprehensive calorie tracker and diet management system. Users begin by entering their height and weight, after which the application calculates their BMI and suggests suitable exercises accordingly. Additionally, the app allows users to choose from a variety of nutritious foods, including specialized options for individuals with conditions such as diabetes. Users can add food items to their favorites cart and compare their nutritional values to make informed dietary choices. Furthermore, the application includes a profile management feature, enabling users to update their details, such as weight and dietary preferences, for a more personalized experience. By combining intelligent exercise recommendations with effective dietary tracking, this project aims to promote better health management and overall well-being.
